SUMMARY

B.Tech student (AI & ML, Gurugram University, CGPA 7.5) specializing in frontend development with React and JavaScript. Built and deployed four production web applications, including an AI-integrated career guidance platform. Comfortable across the stack from UI implementation to API integration, with a working foundation in DSA, OOP, and DBMS. Seeking a Software Engineering internship where I can ship real features and grow under experienced engineers.

SKILLS

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design, Flexbox/Grid, DOM Manipulation, Local Storage API
- **Languages:** JavaScript, Java, Python
- **Tools & Concepts:** Git/GitHub, VS Code, Google Cloud, OOP, DBMS, Data Structures & Algorithms (Intermediate)

PROJECTS

CareerOS AI — *React, JavaScript, AI Integration*[Live Demo](#) | [GitHub](#)

- Built an AI-powered career guidance platform that recommends learning paths based on a user's skill inputs and target role
- Integrated AI to generate personalized career roadmaps, resume suggestions, and skill recommendations
- Developed reusable React components with state management, API integration, and a responsive UI
- Implemented internship discovery, skill-gap analysis, and a progress-tracking dashboard
- Optimized application performance using lazy loading and component reusability *[Add: a number if you measured it — e.g. load time improvement, or how many components made reusable]*

Tech: React.js, JavaScript (ES6+), REST API, CSS3

Expense Tracker — *JavaScript, Local Storage API*[Live Demo](#) | [GitHub](#)

- Developed an income/expense tracking app with persistent client-side storage, so data survives page reloads without a backend
- Implemented full CRUD functionality for transactions using the Local Storage API
- Added category-wise expense tracking, monthly summaries, and automatic balance calculation
- Built responsive charts and filtering by category and date
- Designed a mobile-first responsive interface with reusable components

Tech: JavaScript (ES6+), HTML5, CSS3, Local Storage API

Student Internship Tracker — *React, JavaScript*[Live Demo](#) | [GitHub](#)

- Built a dashboard to track internship applications, deadlines, and status across multiple companies
- Created internship application management with status tracking (Applied, Interview, Selected, Rejected)
- Added search, filter, and sorting functionality for quick access across *[Add: number]* records
- Implemented deadline reminders and application-progress visualization
- Used modular JavaScript for better maintainability

Tech: HTML5, CSS3, JavaScript (ES6+)

Student Success Dashboard — *HTML, CSS, Responsive Design*[Live Demo](#) | [GitHub](#)

- Built an academic performance dashboard with a fully responsive layout across mobile and desktop breakpoints
- Displayed academic performance using interactive charts and progress cards
- Implemented attendance tracking, grade analysis, and subject-wise insights
- Designed responsive layouts using CSS Grid and Flexbox, optimized for desktop, tablet, and mobile

Tech: HTML5, CSS3, CSS Grid, Flexbox

LEADERSHIP & ACTIVITIES

Internshala Student Partner (ISP) — *Internshala* Jun 2026 – Present

- Selected as an Internshala Student Partner (ISP) 2026 for Gurugram, Haryana
- Promote internship and upskilling opportunities among students, and assist peers in exploring career development resources
- Participate in branding, marketing, and outreach campaigns, building leadership, communication, and networking skills

Campus Ambassador — *CampusCrew (Part-time, Remote)* Jun 2026 – Present

- Represent CampusCrew on campus, promoting student-focused opportunities, internships, and career development initiatives
- Engage students through community outreach and social media activity, and assist in marketing campaigns
